

The logo consists of a stylized bar chart with five vertical bars of varying heights, colored in shades of blue and black.

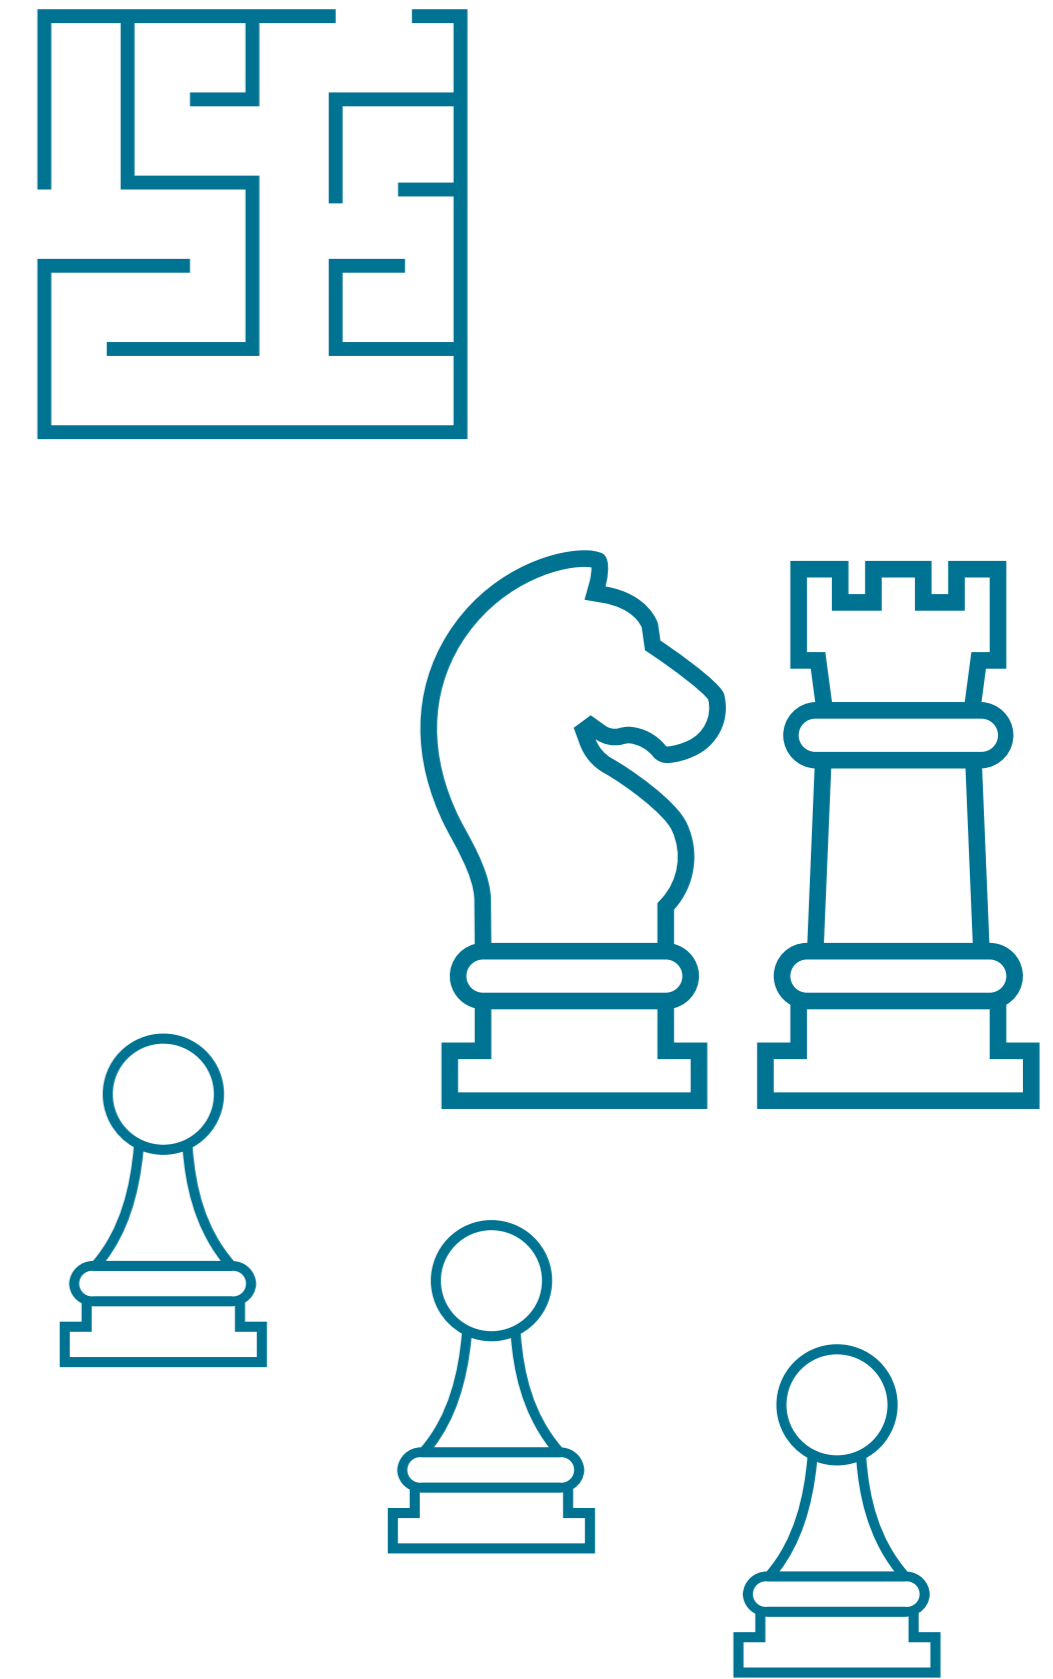

Swiss⁺AlgoTrader

Integrate quantitative trading in
your asset management.

SwissAlgo Trader

“As a professional investor, you are always looking for the best strategies to achieve your and your client’s goals.

With our **quantitative trading software**, we offer you an excellent addition to your portfolio in order to diversify your risk even further.”

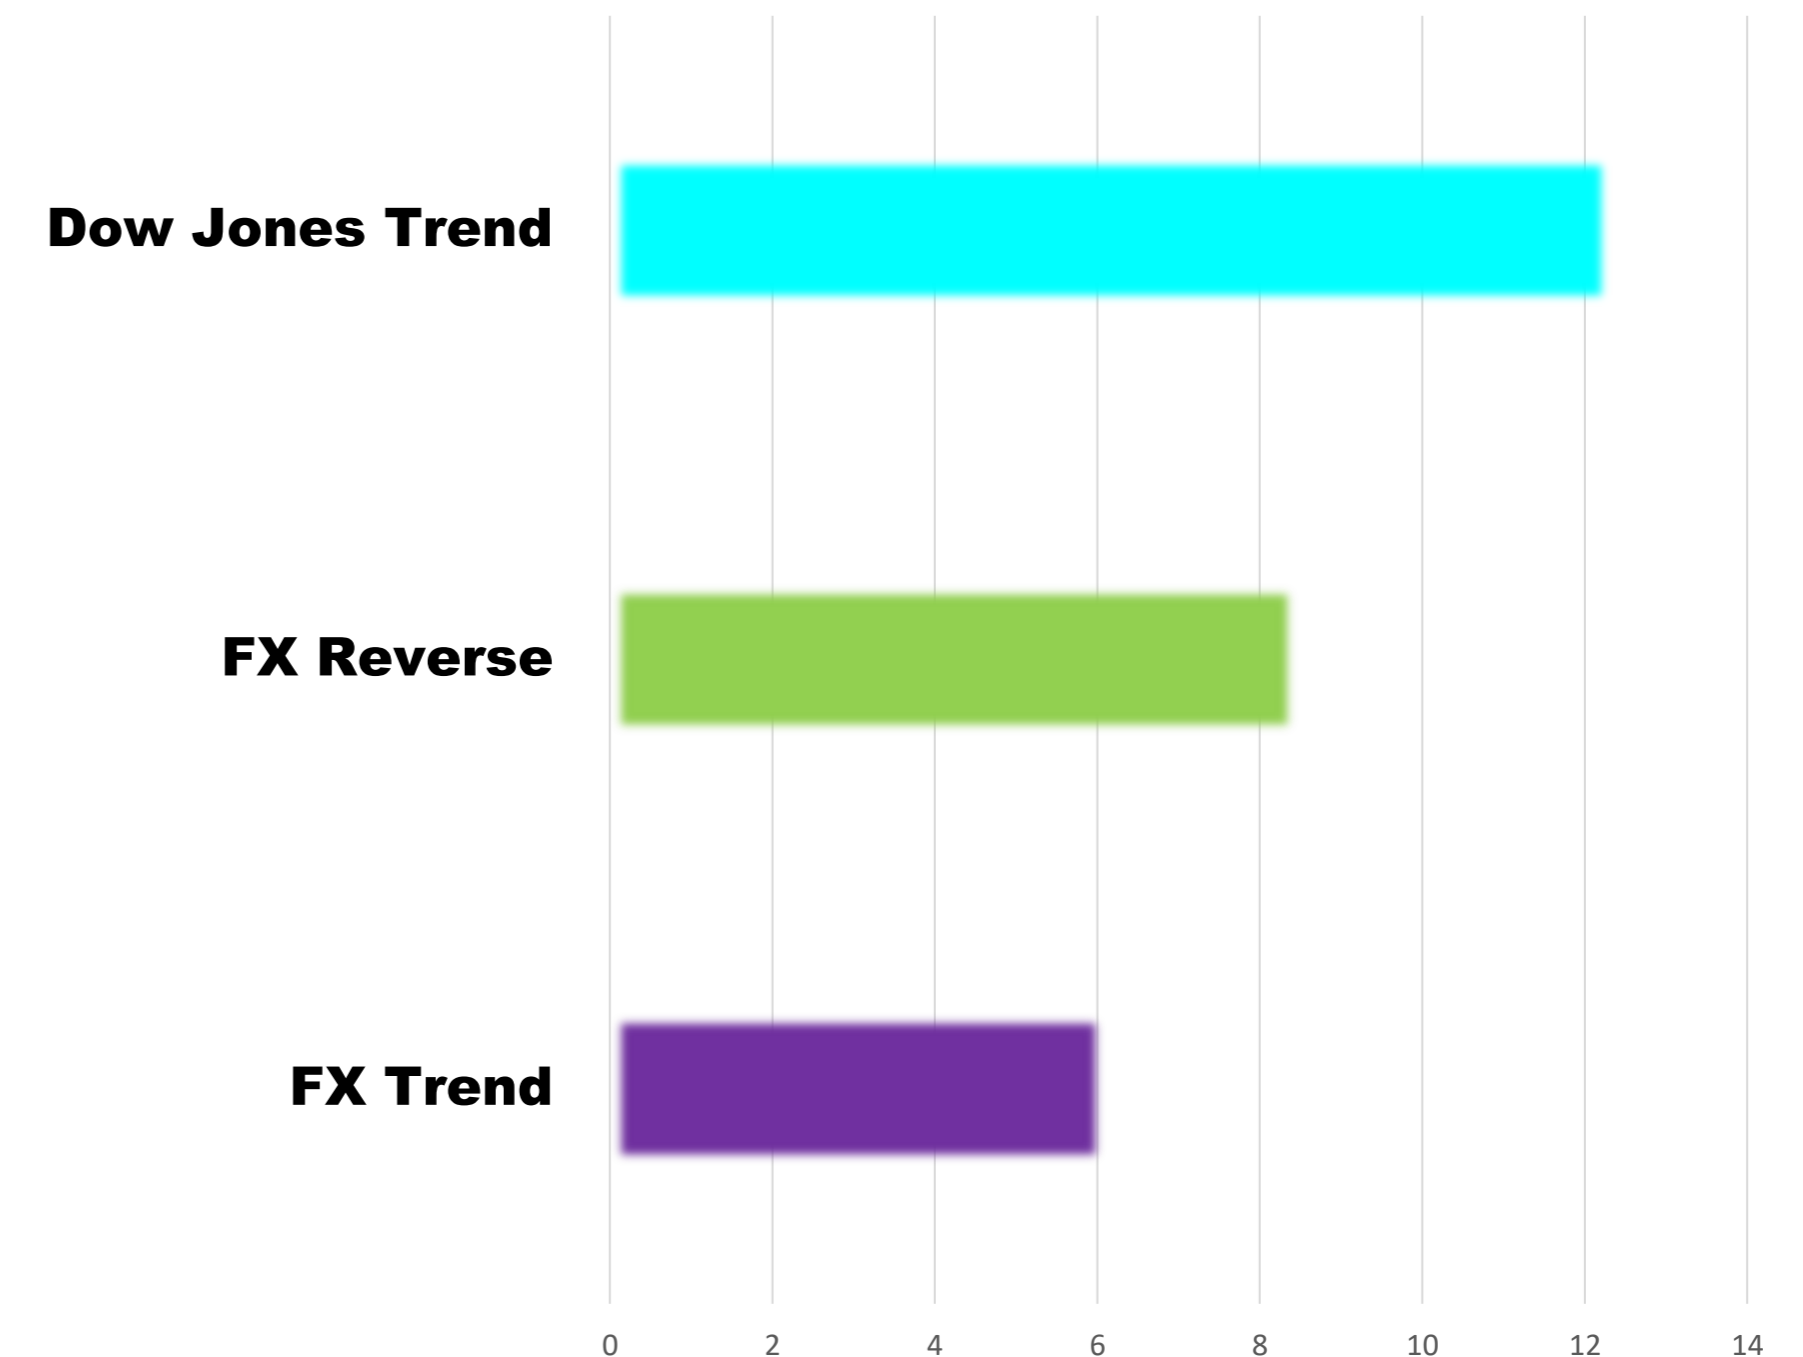

Successful in multiple asset classes.

You can use our ready-to-go strategies, or we can customize our quant software according to your risk profile and your investment focus.

We offer different strategies that can be used in several markets.

In addition to the main field of application FOREX, the SwissAlgoTrader can also be used for futures (index, commodities) and crypto trading.

We integrated a robust risk management for maximum asset protection.

Average equity growth per month in percent. Past results are no guarantee for future earnings! Capital at risk!

Ready-to-go

We developed a ready-to-go software for the Forex market.

This version trades up to 8 currency pairs and is also running on Dow Jones 30.

We can implement this software immediately into your asset management.

FX Blue verified live account:
Pepperstone

Trade your individual assets.

You want to trade a special asset class or security?

Of course, we individualize the software for you according to your requirements and investment focus.

Software as a service.

The software can be easily integrated into your existing trading environment by our cloud solution.

The software has multiple interfaces to manage your accounts in different ways.

With our fair and transparent “performance fee”-pricing model you only pay for what you get.

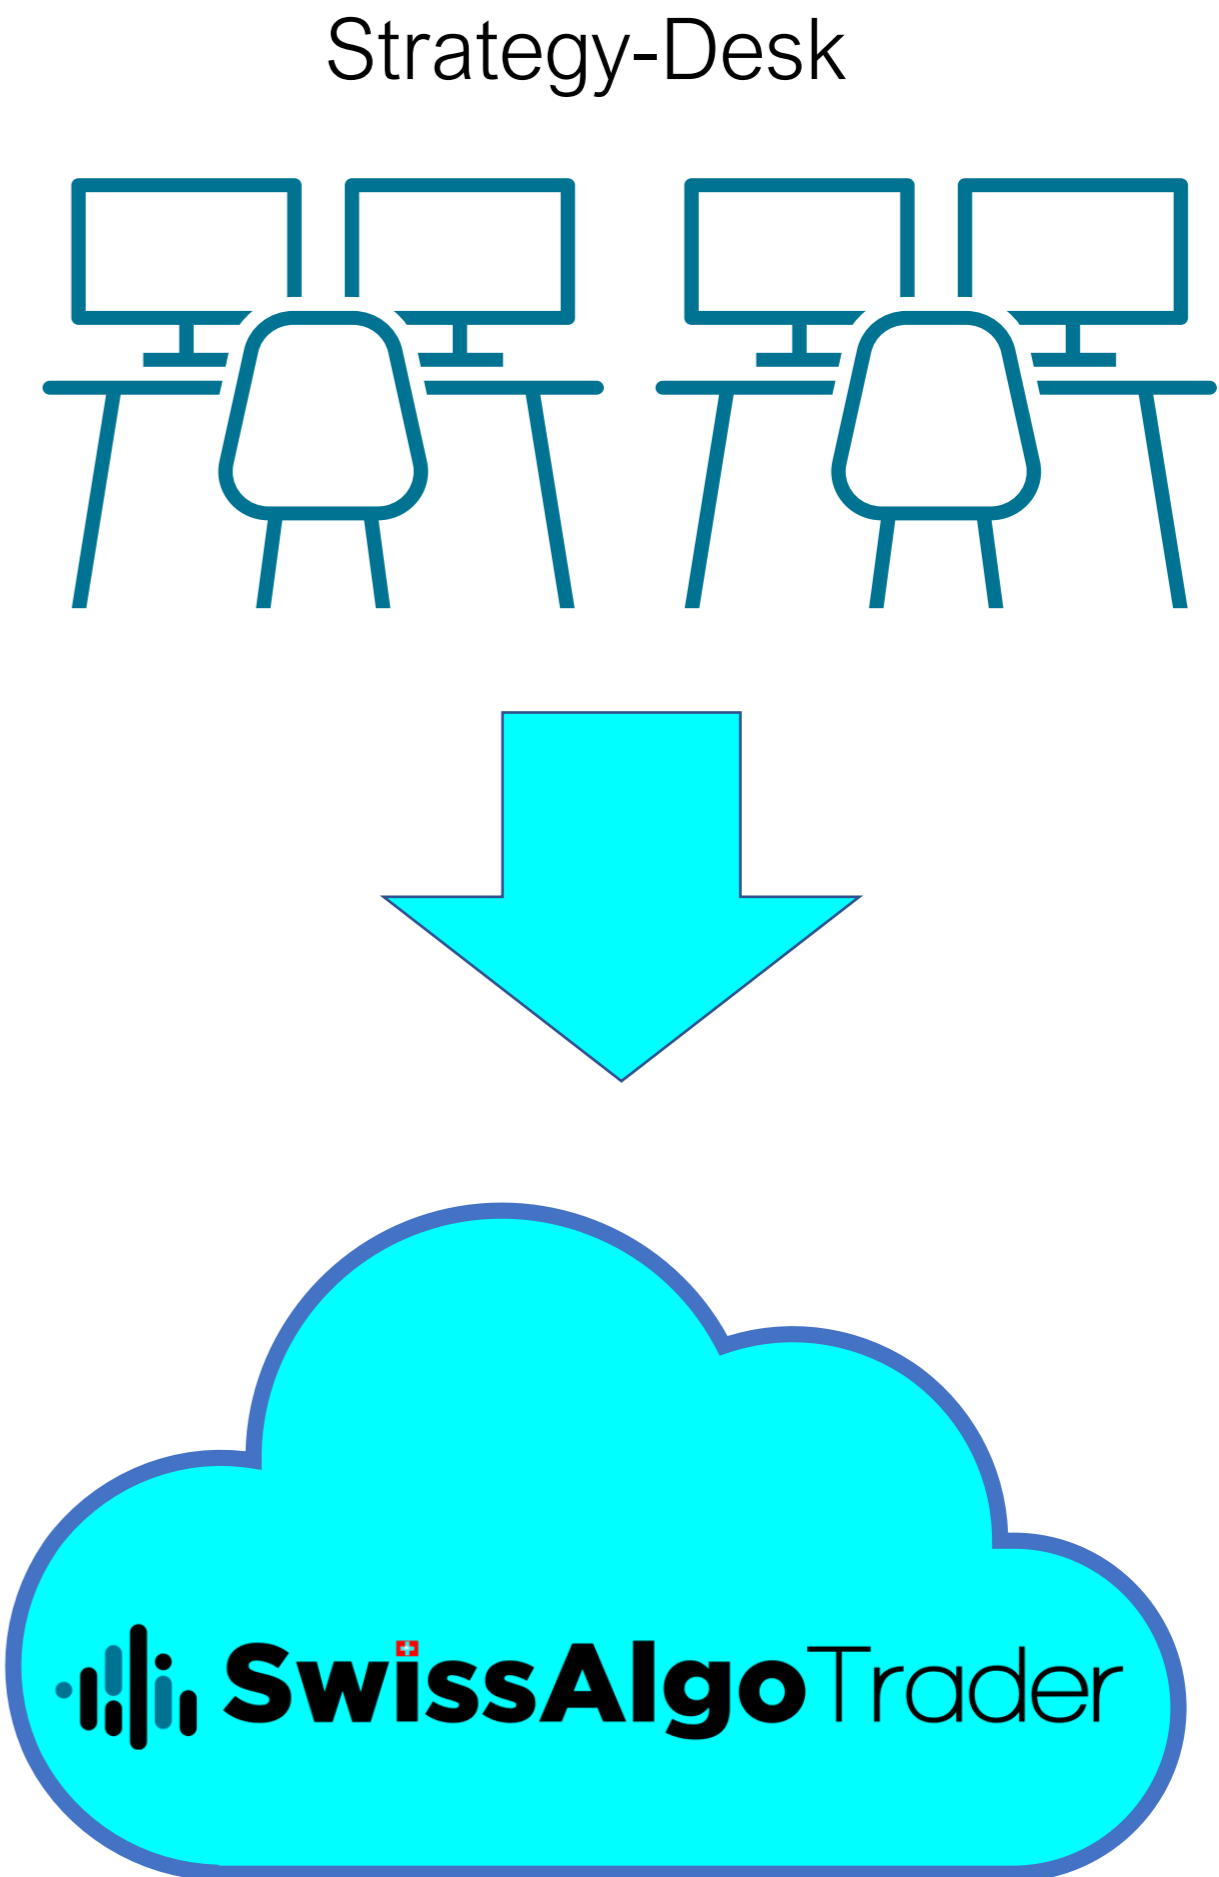

In partnership with:

A symbiosis of cutting-edge technology and decades of human experience.

Our algorithmic trading software is more than mathematic rules and historic data.

At our strategy desk, based in Switzerland, a team of market analysts and quant trading specialists is watching the daily market environment and will adjust the software settings if necessary.
